Cleanrooms- Cold Rooms

## Sandwich Panel Types

We can provide machine-made and hand-made sandwich panels of different types of materials for various applications.

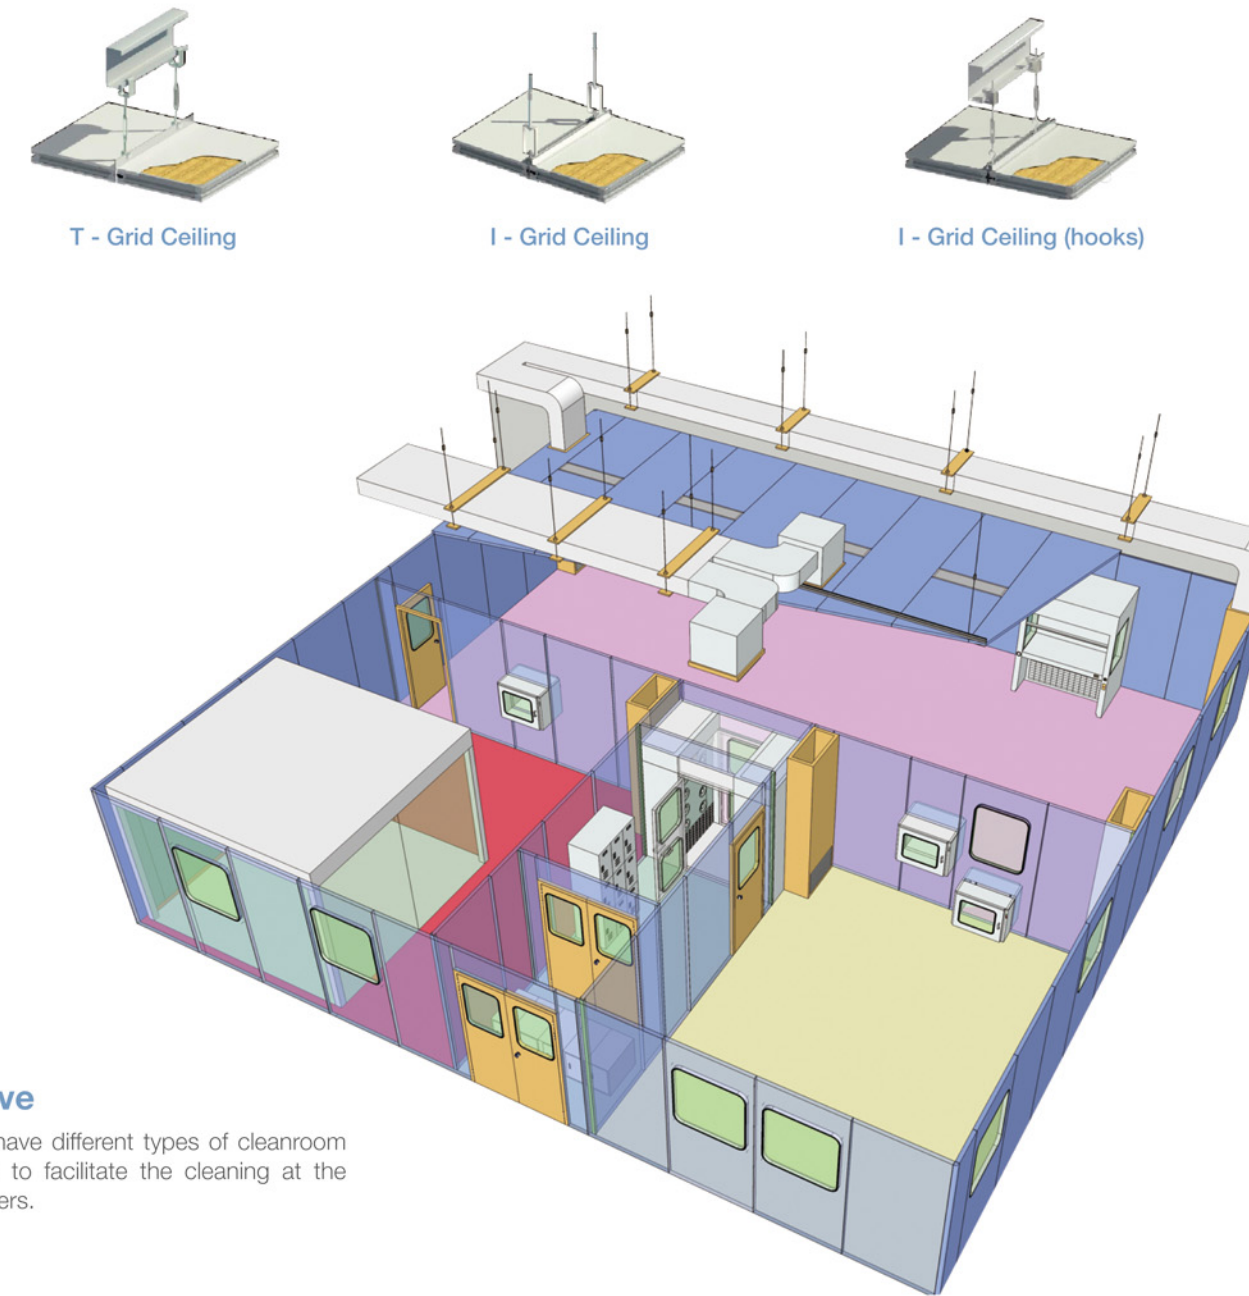

## Cleanroom Doors

We have a wide range of door designs, materials and colors, including embedded double glazing.

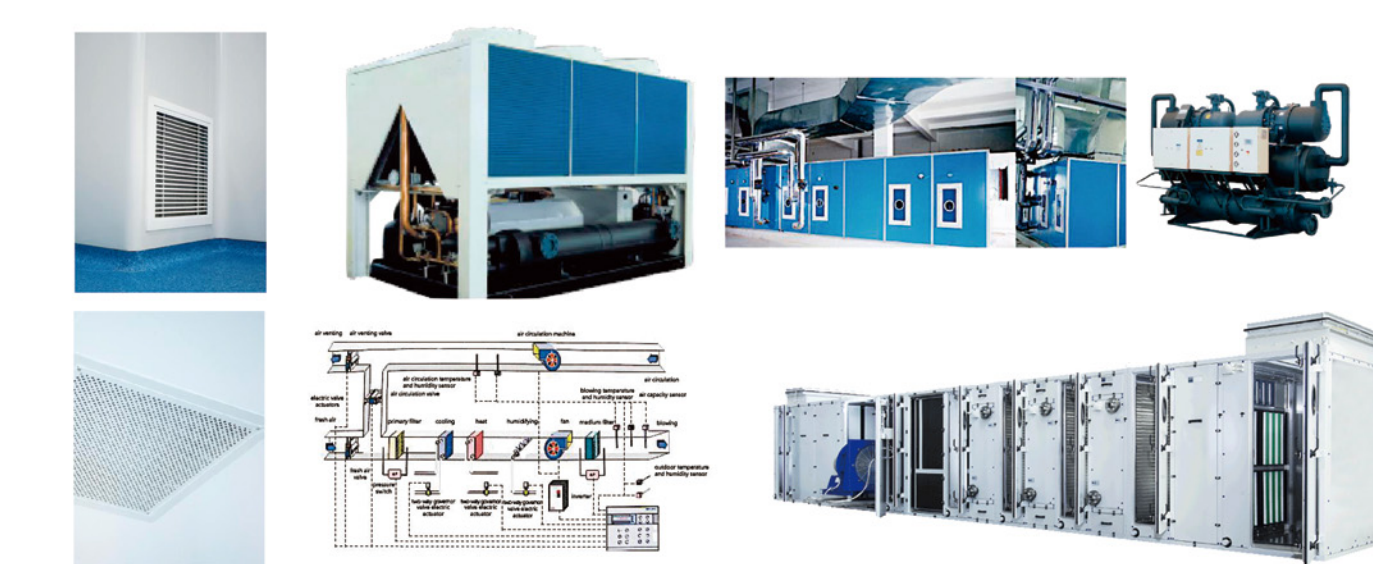

## Panel Ceiling

We offer different types of panel ceiling systems. We can provide advices or follow the specific requirements from customers.

## HVAC Systems

We are able to provide all the systems related to heat, ventilation and air conditioning for controlled areas. Chillers, heat pumps, air handlers, dehumidifiers, HEPA boxes, FFU, diffusers, air ducts, etc.

## Cleanroom Windows

Manufactured under controlled environment, the windows can make the interior of the cleanroom visible. The design ensures the temperature and humidity of the room and avoids any contamination between the double layer glasses.

## Pass Boxes

Eliminate unnecessary personnel entry and keep contamination-free materials in and out of cleanroom.
